

Supplemental grid discrepancies: D = 0.53, each grid at its own GE price

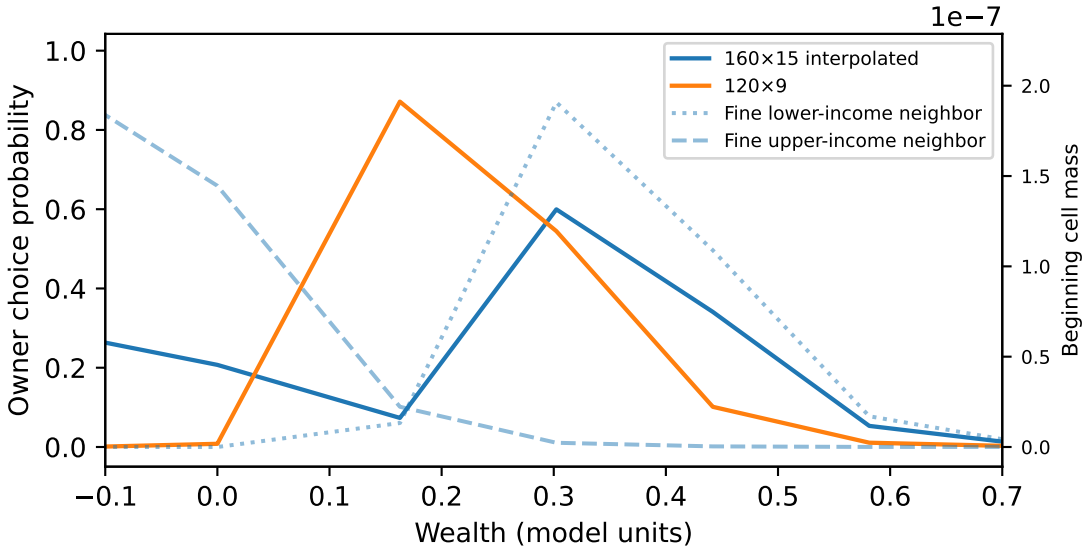

Proposal mass weighted, by wealth bin

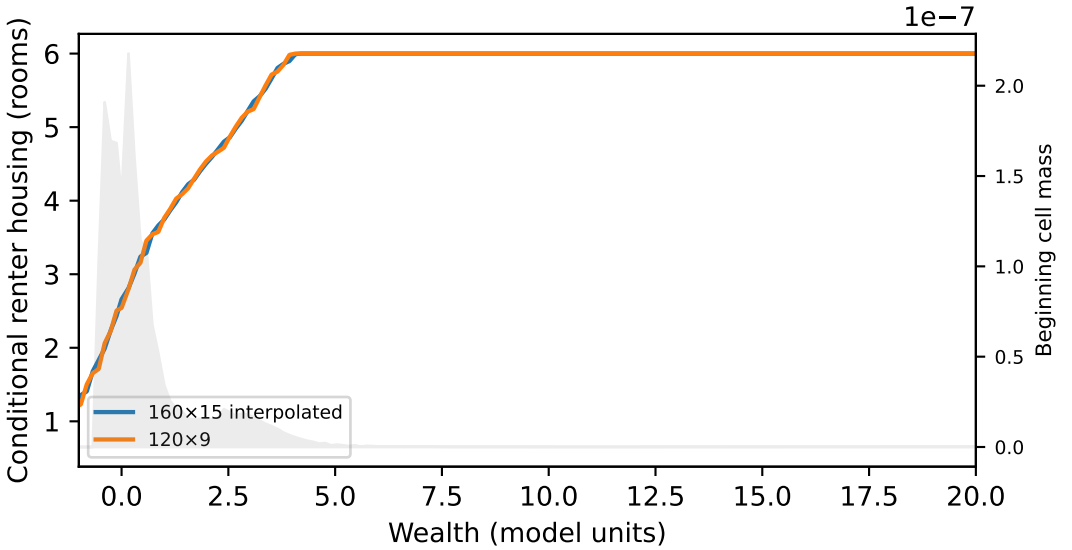

Median through 99th percentile

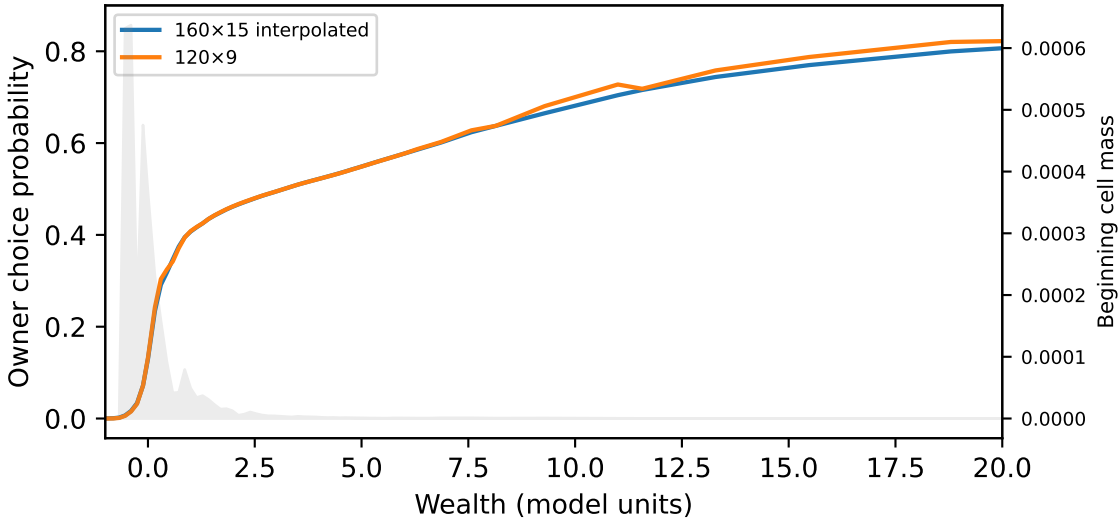

Age 62, z=0.284; children ever born/home 3/3 (wealth zoom); slice mass=1.89e-06

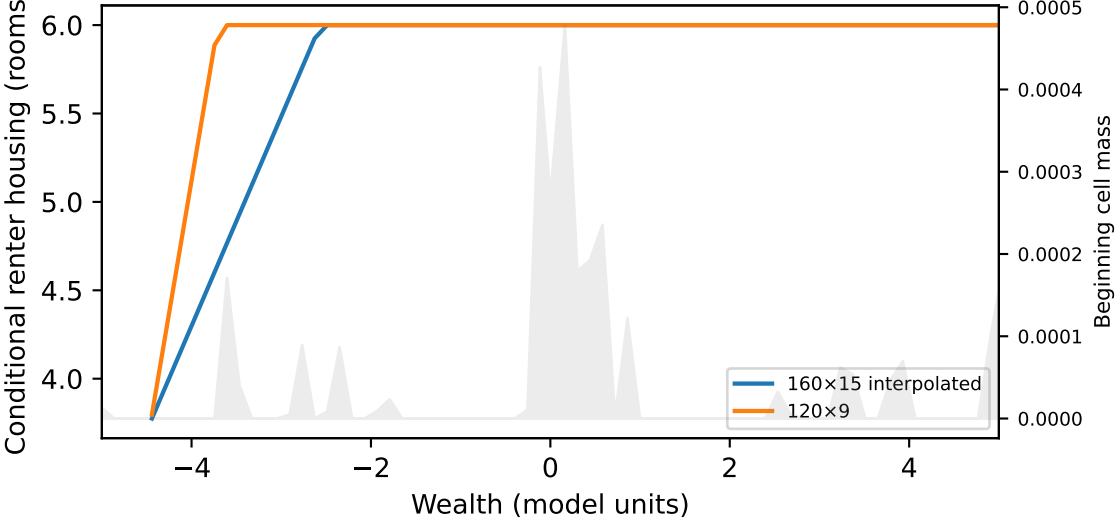

Age 62, z=0.284; children ever born/home 3/3; slice mass=1.89e-06

Age 30, z=0.778; children ever born/home 0/0; slice mass=0.00324

Age 18, z=2.13; children ever born/home 1/1; slice mass=0.00305

Weight: post-fertility, pre-tenure proposal mass. Housing/saving/consumption are conditional policies; these are not realized-policy accuracy measures. No occupancy cutoff. Standard plots unchanged.
