

HANK-z Full-Equilibrium Prototype

Isolated overnight branch figure packet

accepted: True

strict converged: True

iterations: 15

final GE error: 0.000167292

plot solve seconds: 44.74

b states: 30

z states: 3

Structural state in this prototype:

(b, d, i, a, n, s, z)

The mortgage-account state μ is not active in this full-GE packet.

01 equilibrium trace

Equilibrium Convergence

House Prices

Ownership During Fixed Point

Spatial Population Shares

02 moment target benchmark model

Targets, Current Benchmark, and HANK-z Full-GE Prototype

02b moment deviations from target

03 z process and age mass

Earnings Transition Matrix

Distribution of z by Age

04 sorting age profiles

05 sorting heatmaps

06 tenure rung sorting by z

Tenure/Rung Shares, Ages 25-34

Tenure/Rung Shares, Ages 35-44

Tenure/Rung Shares, Ages 45-54

Tenure/Rung Shares, Ages 55-64

07 fertility by z and wealth

Expected Fertility Choice

Fertile Childless Mass

08 aggregate sorting by z
