

Same-sex diagnosis, national ACS 2005–2019: collected results

Job 18284841 (COMPLETED 0:0). 31/31 receipts; 27 regression cases all full fit; 0 warnings; baseline reproduction exact; 51-state key coverage one-to-one with 0 recompute mismatches. No IV or AR fits. RF: rooms, bedrooms, owner (pp). FS: pp of 3+ coresident children. BB–GG from each fit’s saved clustered covariance. For the BB–GG row, “ F ” is the squared t on the FS contrast.
